

Job Title: Project Manager – Training

Organizational Overview

Interested in contributing to Canada's food production value chain? Did you know Canadian farmers are environmental stewards, working in soil conservation, carbon sequestration and playing an important role in climate change while they work to feed Canada and the world? The Canadian agricultural industry is dynamic, with science-based advancements and adoption of automation, digitalization and technology.

The Canadian Agricultural Human Resource Council (CAHRC) is a national, non-profit organization focused on addressing human resource issues facing agricultural businesses across Canada so that the industry can continue to grow and meet the demand of feeding Canadians and the world. Our team is expanding and there are excellent opportunities available with us that support the Canadian agricultural industry.

Job Description

The Project Manager – Training will manage the development and delivery of training-related project activities within quality, budget and time constraints. The Project Manager-Training, reports to the AgriSkills Program Manager and manages the development and delivery of training programs and services. This includes managing curriculum development and the Learning Management System (LMS). It also includes working with partners to review training and e-learning content and oversee the training and e-learning delivery process. The Project Manager-Training ensures the quality of training and e-learning delivery; manages project budget, timelines and targets; coordinates with suppliers, partners, organizations, clients and stakeholders.

Main Responsibilities

- Maintain quality of AgriJobs training and e-learning products and services, including the Learning Management System (LMS).
- Liaise with stakeholders to ensure effective delivery of products and services.
- Monitor, track and report on usage of training and e-learning programs.
- Develop updates and new products as project initiatives.
- Establish project scope, identify activities, schedule and costing and maintain as necessary.
- Define processes for project change control, risk management and quality management.
- Prepare quality assurance procedures and minimize risk on project.
- Create and execute project work plans and revise as appropriate to meet changing needs and requirements.
- Secure and liaise with project champions and stakeholders.
- Manage day-to-day operational aspects of a project.
- Conduct research and development activities as required to support project including the preparation of communication materials.
- Establish strong relationships with project stakeholders.
- Apply project-related procedures and enforce project standards.
- Perform project quality control and assurance, liaising with team, management and funding authority and preparing reports as required.
- Contribute to marketing and communications materials for training and e-learning product and services including presentation materials, emails, brochures, social media materials, website

content to clarify unique features and value to various stakeholder groups.

- Ensure invoices are generated on a timely basis to meet monthly forecast and invoicing schedules.
- Deliver high quality outputs in compliance with agreed time and budget constraints and to the satisfaction of the clients and stakeholders including all required project reports.
- Ensure project documents are complete, current and stored appropriately including all project management files, communications, drafts, deliverables and reports.
- Identify new and emerging needs of stakeholders and communicate service options to secure new business.
- Prepare proposals for future business as required.

Education

University Bachelor or Master's degree in Education, Training and Development, Business, Agriculture or related discipline.
