

Dr. Nancy Tout,
Head of R&D
Syngenta (Canada)
T: 519-837-5324
E: nancy.tout@syngenta.com

Dr. Nancy Tout is the Head of Regulatory and Biological Assessment for Syngenta in Canada, where she leads the Canadian Research & Development team. Nancy enjoys sharing her passion for science and agricultural literacy through her support and personal involvement in Scientists in School and Agriculture in the Classroom. Dr. Tout has also been named to Syngenta's North America Diversity and Inclusion Champion Network in support of strategies and programs that embrace the unique perspectives and capabilities of employees. Nancy holds a BSc. (Honours Biology) from Wilfrid Laurier University and a Ph.D. in microbiology and immunology from the University of Guelph and completed post-doctoral training in the Guelph Department of Environmental Biology.

Nancy participates on Bioenterprise Corporation's Science and Innovation Advisory Committee to advise on trends in global research in the agri-technology sectors. She is also a Board member of Life Sciences Ontario, the voice of the life sciences community across Ontario.

Born, raised, and educated in Southwestern Ontario, Nancy now gives back to her community through work as a Research Information Volunteer with the Juvenile Diabetes Research Foundation, where once again, science continues to play a central role in her life and her vision of a cure for all children living with Type 1 Diabetes.

“Women’s contribution to agriculture is critical to global food security and so I consider my contribution to this project as part of our collective call to action to support women not just in communities around the world to advance agriculture, but women right here in our own backyard in Canada,” says Dr. Tout.
